PROFILE

- Dynamic Full Stack Developer with expertise in HTML, CSS, JavaScript, Vue.js, PHP, Laravel, and Figma, committed to continuous learning and improvement.
- Extensive experience in web application development and collaborative project execution, with a proven track record of adopting new technologies to deliver innovative and efficient solutions.
- Eager to contribute to a forward-thinking company, leveraging skills in modern technologies to drive project success.

EMPLOYMENT HISTORY

Freelance Consultant at Sentinel Systems, Amsterdam

January 2022 — July 2022

- Collaborated with clients to understand project requirements and objectives.
- Designed and executed visually engaging and highly functional landing pages.
- Focused on optimizing user engagement and enhancing overall user experience.

Full Stack Developer at Konnect Kit, Amsterdam

July 2021 — January 2022

Played a key role in frontend development projects, notably contributing to the creation of Bewitt, an application for live events that enhances venue discovery, talks, workshops, and livestreams.

Full Stack Developer at TogatherFinance, Amsterdam

June 2020 — July 2021

Worked on the development of a comprehensive credit management system, focusing on optimizing front-end usability and integration with back-end services, enhancing system efficiency and user engagement.

EDUCATION

Software Development, 42Lisboa, Lisbon

October 2023 — Present

- Actively engaged in a globally recognized, project-based learning program fostering peer-to-peer collaboration.
- Focus on key technologies and methodologies essential in the tech landscape.
- Emphasis on continual skill enhancement through in-depth studies of algorithms, data structures, advanced programming languages, and system architecture.

INTERNSHIPS

Full stack developer - intern at TogatherFinance, Amsterdam

August 2019 — June 2020

- Gained hands-on experience in designing, creating, and maintaining full-stack web applications, using technologies such as HTML, CSS, JavaScript, Vue.js (front end), PHP, Laravel (back end), and Figma (design).
